#### I. Order

This Clean Water Act (CWA) section 401 Water Quality Certification action and Order (Order) is issued at the request of Silverado Hidden Hills, LLC (herein after Permittee) for the Project. This Order is for the purpose described in application submitted by the Permittee. The application was received on 30 November 2016. The application was deemed complete on 16 February 2017.

#### II. Public Notice

The Central Valley Water Board provided public notice of the application pursuant to California Code of Regulations, title 23, section 3858 from 2 December 2016 to 30 December 2016. The Central Valley Water Board did not receive any comments during the comment period.

#### III. Project Purpose

The Proposed Project purpose is to provide a residential community. Infrastructure to be developed for the community will include paved roads, underground utilities, storm water improvements facilities, and other associated improvements.

#### **IV.** Project Description

The Hidden Hills, Phase 1 Project involves the construction of a small-scale residential development (approximately 75 units) and associated infrastructure, including the establishment of open space areas, paved roads, underground utilities, storm water improvement facilities, and other associated improvements on 25-acres. The specific activities that require the discharge of dredged or fill material in waters of the United States are the construction of paved roadways, residential house pads, and storm water improvement facilities. These activities will result in the permanent loss of approximately 0.22-acre of seasonal wetland and seasonal swale, and indirect effects to approximately 0.003-acre of seasonal wetland.

#### V. Project Location

Location: 481 Oak Tree Lane, Lincoln, California, 95648

County: Placer County

Assessor's Parcel Number: 021-274-028-000, 021-274-029-000, 021-274-027-000, and

021-274-026-000

Nearest City: City of Lincoln

Section 14, Township 12 North, Range 6 East, MDB&M.

Latitude: 38.877°N and Longitude: -121.264W

Maps showing the Project location are found in Attachment A of this Order.

#### VI. Project Impact and Receiving Waters Information

The Project is located within the jurisdiction of the Central Valley Water Board. Receiving waters and groundwater potentially impacted by this Project are protected in accordance with the Water Quality Control Plan for the Sacramento River and San Joaquin River Basins, Fourth Edition, revised April 2016 (Basin Plan) The plan for the region and other plans and

policies may be accessed online at: <a href="http://www.waterboards.ca.gov/plans">http://www.waterboards.ca.gov/plans</a> policies/. The Basin Plan includes water quality standards, which consist of existing and potential beneficial uses of waters of the state, water quality objectives to protect those uses, and the state and federal antidegradation policies.

Project impact and receiving waters information can be found in Attachment B. Table 1 of Attachment B shows the receiving waters and beneficial uses of waters of the state impacted by the Project. Individual impact location and quantity is shown in Table 2 of Attachment B.

#### VII. Description of Direct Impacts to Waters of the State

Mass grading will occur on the whole 24.7-acre site and concrete/asphalt will be placed at locations within the site for building pads, driveways, sidewalks, and streets. The mass grading will fill the 0.225-acre wetland.

Total Project fill/excavation quantities for all impacts are summarized in Table 1. Permanent impacts are categorized as those resulting in a physical loss in area and also those degrading ecological condition only.

Table 1: Total Pr	roject Dro	edge Qu	antity							
						Perman	ent Impact			
Aquatic Resource Type	Temp	orary Im		Physic	Physical Loss of Area			Degradation of Ecological Condition Only		
	Acres	CY <sup>2</sup>	LF <sup>2</sup>	Acres	CY	LF	Acres	CY	LF	
Riparian Zone										
Stream Channel										
Wetland				0.225	9,901	75				

#### VIII. Description of Indirect Impacts to Waters of the State

The Central Valley Water Board recognizes the potential for indirect impacts to waters of the state associated with the Project. The project will indirectly impact 0.003-acres of a seasonal wetland due to grading activities.

#### IX. Avoidance and Minimization - - Not Applicable

#### X. Compensatory Mitigation

The Permittee has agreed to provide compensatory mitigation for direct impacts described in Section VII for permanent impacts.

#### XI. California Environmental Quality Act (CEQA)

On 11 December 2012, the City of Lincoln, as lead agency, certified an Environmenal Impact Report (EIR) (State Clearinghouse (SCH) No. 2010102018) for the Project and filed a Notice of Determination (NOD) at the SCH on 14 December 2012. Pursuant to CEQA, the Central Valley Water Board has made Findings of Facts (Findings) which support the issuance of this Order and are included in Attachment C.

<sup>&</sup>lt;sup>1</sup> Includes only temporary direct impacts to waters of the state and does not include upland areas of temporary disturbance which could result in a discharge to waters of the state. Temporary impacts, by definition, are restored to pre-project conditions and therefore do not include a physical loss of area or degradation of ecological condition.

<sup>&</sup>lt;sup>2</sup> Cubic Yards (CY); Linear Feet (LF)

#### XII. Petitions for Reconsideration

Any person aggrieved by this action may petition the State Water Resources Control Board to reconsider this Order in accordance with California Code of Regulations, title 23, section 3867. A petition for reconsideration must be submitted in writing and received within 30 calendar days of the issuance of this Order.

#### XIII. Fees Received

An application fee of \$1,293.00 was received on 30 November 2016. The fee amount was determined as required by California Code of Regulations, title 23, sections 3833(b)(3) and 2200(a)(3), and was calculated as category A - Fill & Excavation Discharges (fee code 84) with the dredge and fill fee calculator.

An additional fee of \$1,034.00 based on total Project impacts was received on 8 March 2017.

#### XIV. Conditions

The Central Valley Water Board has independently reviewed the record of the Project to analyze impacts to water quality and designated beneficial uses within the watershed of the Project. In accordance with this Order, the Permittee may proceed with the Project under the following terms and conditions:

#### A. Authorization

Impacts to waters of the state shall not exceed quantities shown in Table 1.

#### B. Reporting and Notification Requirements

The following section details the reporting and notification types and timing of submittals. Requirements for the content of these reporting and notification types are detailed in Attachment D, including specifications for photo and map documentation during the Project. Written reports and notifications must be submitted using the Reporting and Notification Cover Sheet located in Attachment D, which must be signed by the Permittee or an authorized representative.

The Permittee must submit all notifications, submissions, materials, data, correspondence, and reports in a searchable Portable Document Format (PDF). Documents less than 50 MB must be emailed to: <a href="mailto:centralvalleyredding@waterboards.ca.gov">centralvalleyredding@waterboards.ca.gov</a>.

In the subject line of the email, include the Central Valley Water Board Contact, Project name, and WDID. Documents that are 50 MB or larger must be transferred to a disk and mailed to the Central Valley Water Board Contact.

#### 1. Project Reporting

**a. Annual Reporting:** The Permittee shall submit an Annual Report each year on the 1st day of May. Annual reporting shall continue until a Notice of Project Complete Letter is issued to the Permittee.

#### 2. Project Status Notifications

**a.** Commencement of Construction: The Permittee shall submit a Commencement of Construction Report at least seven (7) days prior to start of initial ground disturbance activities.

b. Request for Notice of Completion of Discharges Letter: The Permittee shall submit a Request for Notice of Completion of Discharges Letter following completion of active Project construction activities, including any required restoration and permittee-responsible mitigation. This request shall be submitted to the Central Valley Water Board staff within thirty (30) days following completion of all Project construction activities. Upon acceptance of the request, Central Valley Water Board staff shall issue a Notice of Completion of Discharges Letter to the Permittee which will end the active discharge period and associated annual fees.

- c. Request for Notice of Project Complete Letter: The Permittee shall submit a Request for Notice of Project Complete Letter when construction and/or any post-construction monitoring is complete,<sup>3</sup> and no further Project activities will occur. This request shall be submitted to Central Valley Water Board staff within thirty (30) days following completion of all Project activities. Upon approval of the request, the Central Valley Water Board staff shall issue a Notice of Project Complete Letter to the Permittee which will end the post discharge monitoring period and associated annual fees.
- **3. Conditional Notifications and Reports:** The following notifications and reports are required as appropriate.
  - a. Accidental Discharges of Hazardous Materials<sup>4</sup>

Following an accidental discharge of a reportable quantity of a hazardous material, sewage, or an unknown material, the following applies (Wat. Code, § 13271):

- As soon as (A) Permittee has knowledge of the discharge or noncompliance, (B) notification is possible, and (C) notification can be provided without substantially impeding cleanup or other emergency measures then:
  - first call 911 (to notify local response agency)
  - then call Office of Emergency Services (OES) State Warning Center at:(800) 852-7550 or (916) 845-8911
  - Lastly follow the required OES procedures as set forth in: <a href="http://www.caloes.ca.gov/FireRescueSite/Documents/CalOES-Spill Booklet\_Feb2014\_FINAL\_BW\_Acc.pdf">http://www.caloes.ca.gov/FireRescueSite/Documents/CalOES-Spill Booklet\_Feb2014\_FINAL\_BW\_Acc.pdf</a>
- **ii.** Following notification to OES, the Permittee shall notify Central Valley Water Board, as soon as practicable (ideally within 24 hours). Notification may be delivered via written notice, email, or other verifiable means in accordance with section XIV.B.

<sup>3</sup> Completion of post-construction monitoring shall be determined by Central Valley Water Board staff and shall be contingent on successful attainment of restoration and mitigation performance criteria.

<sup>&</sup>lt;sup>4</sup> "Hazardous material" means any material that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. "Hazardous materials" include, but are not limited to, hazardous substances, hazardous waste, and any material that a handler or the administering agency has a reasonable basis for believing that it would be injurious to the health and safety of persons or harmful to the environment if released into the workplace or the environment. (Health & Saf. Code, § 25501.)

**iii.** Within five (5) working days of notification to the Central Valley Water Board, the Permittee must submit an Accidental Discharge of Hazardous Material Report.

- b. Violation of Compliance with Water Quality Standards: The Permittee shall notify the Central Valley Water Board of any event causing a violation of compliance with water quality standards. Notification may be delivered via written notice, email, or other verifiable means in accordance with section XIV.B.
  - i. This notification must be followed within three (3) working days by submission of a Violation of Compliance with Water Quality Standards Report.

#### c. In-Water Work and Diversions

- i. The Permittee shall notify the Central Valley Water Board at least forty-eight (48) hours prior to initiating work in water or stream diversions. Notification may be delivered via written notice, email, or other verifiable means in accordance with section XIV.B.
- **ii.** Within three (3) working days following completion of work in water or stream diversions, an In-Water Work/Diversions Water Quality Monitoring Report must be submitted to Central Valley Water Board staff.

#### d. Modifications to Project

Project modifications may require an amendment of this Order. The Permittee shall give advance notice to Central Valley Water Board staff if Project implementation as described in the application materials is altered in any way or by the imposition of subsequent permit conditions by any local, state or federal regulatory authority by submitting a Modifications to Project Report. The Permittee shall inform Central Valley Water Board staff of any Project modifications that will interfere with the Permittee's compliance with this Order. Notification may be made in accordance with conditions in the certification deviation section of this Order.

- e. Transfer of Property Ownership: This Order is not transferable in its entirety or in part to any person or organization except after notice to the Central Valley Water Board in accordance with the following terms:
  - i. The Permittee must notify the Central Valley Water Board of any change in ownership or interest in ownership of the Project area by submitting a Transfer of Property Ownership Report. The Permittee and purchaser must sign and date the notification and provide such notification to the Central Valley Water Board at least 10 days prior to the transfer of ownership. The purchaser must also submit a written request to the Central Valley Water Board to be named as the permittee in a revised order.
  - **ii.** Until such time as this Order has been modified to name the purchaser as the permittee, the Permittee shall continue to be responsible for all requirements set forth in this Order.
- f. Transfer of Long-Term BMP Maintenance: If maintenance responsibility for post-construction BMPs is legally transferred, the Permittee must submit to the Central Valley Water Board a copy of such documentation and must provide the transferee with a copy of a long-term BMP maintenance plan that complies with manufacturer or designer specifications. The Permittee must provide such notification to the Central Valley Water Board with a Transfer of Long-Term BMP

Maintenance Report at least 10 days prior to the transfer of BMP maintenance responsibility.

#### C. Water Quality Monitoring

- 1. General: Continuous visual surface water monitoring shall be conducted during active construction periods to detect accidental discharge of construction related pollutants (e.g. oil and grease, turbidity plume, or uncured concrete). The Permittee shall perform surface water sampling:
  - a. when performing any in-water work;
  - **b.** during the entire duration of temporary surface water diversions;
  - **c.** in the event that the Project activities result in any materials reaching surface waters; or
  - d. when any activities result in the creation of a visible plume in surface waters.
- 2. Accidental Discharges/Noncompliance: Upon occurrence of an accidental discharge of hazardous materials or a violation of compliance with a water quality standard, Central Valley Water Board staff may require water quality monitoring based on the discharge constituents and/or related water quality objectives and beneficial uses.

#### 3. In-Water Work or Diversions:

During planned in-water work or during the entire duration of temporary water diversions, any discharge(s) to waters of the state shall conform to the following water quality standards:

- **a.** Waters shall not contain oils, greases, waxes, or other materials in concentrations that cause nuisance, result in a visible film or coating on the surface of the water or on objects in the water, or otherwise adversely affect beneficial uses.
- **b.** Activities shall not cause turbidity increases in surface water to exceed:
  - where natural turbidity is less than 1 Nephelometric Turbidity Units (NTUs), controllable factors shall not cause downstream turbidity to exceed 2 NTU;
  - II. where natural turbidity is between 1 and 5 NTUs, increases shall not exceed 1 NTU;
  - III. where natural turbidity is between 5 and 50 NTUs, increases shall not exceed 20 percent;
  - IV. where natural turbidity is between 50 and 100 NTUs, increases shall not exceed 10 NTUs;
  - V. where natural turbidity is greater than 100 NTUs, increases shall not exceed 10 percent.

In determining compliance with the above limits, appropriate averaging periods may be applied provided that beneficial uses will be fully protected. Averaging periods may only be used with prior permission of the Central valley Water Board Executive Officer.

c. Activities shall not cause settleable matter to exceed 0.1 mL/L in surface waters as measured in surface waters within approximately 300 feet downstream of the Project.

Sampling during in-water work or during the entire duration of temporary water diversions shall be conducted in accordance with Table 2 sampling parameters.<sup>5</sup> The sampling requirements in Table 2 shall be conducted upstream out of the influence of the Project, and approximately 300 feet downstream of the work area.

The sampling frequency may be modified for certain projects with written approval from Central Valley Water Board staff. A surface water monitoring report, as described in Attachment D, shall be submitted within two weeks on initiation of in-water construction, and every two weeks thereafter. In reporting the data, the Permittee shall arrange the data in tabular form so that the sampling locations, date, constituents, and concentrations are readily discernible. The data shall be summarized in such a manner to illustrate clearly whether the Project complies with Order requirements. The report shall include surface water sampling results, visual observations, and identification of the turbidity increase in the receiving water applicable to the natural turbidity conditions specified in the turbidity criteria in XIV.C.3.b.

If no sampling is required, the Permittee shall submit a written statement stating, "No sampling was required" within two weeks on initiation of in-water construction, and every two weeks thereafter.

Table 2: Sample Type	and Frequency R	equirements	
Parameter	Unit of	Type of	Minimum Frequency
	Measurement	Sample	
Turbidity	NTU	Grab	Every 4 hours
Settleable Material	ml/L	Grab	Every 4 hours
Visible construction related pollutants <sup>6</sup>	Observation	Visual Inspections	Continuous throughout the construction period

4. Post-Construction: Visually inspect the Project site during the rainy season for one year to ensure excessive erosion, stream instability, or other water quality pollution is not occurring in or downstream of the Project site. If water quality pollution is occurring, contact the Central Valley Water Board staff member overseeing the Project within three (3) working days. The Central Valley Water Board may require the submission of a Violation of Compliance with Water Quality Standards Report. Additional permits may be required to carry out any necessary site remediation.

#### D. Standard

<sup>5</sup> Pollutants shall be analyzed using the analytical methods described in 40 Code of Federal Regulations Part 136; where no methods are specified for a given pollutant, the method shall be approved by Central Valley Water Board staff. Grab samples shall be taken between the surface and mid-depth and not be collected at the same time each day to get a complete representation of variations in the receiving water. A hand-held field meter may be used, provided the meter utilizes a U.S. EPA-approved algorithm/method and is calibrated and maintained in accordance with the manufacturer's instructions. A calibration and maintenance log for each meter used for monitoring shall be maintained onsite.

<sup>&</sup>lt;sup>6</sup> Visible construction-related pollutants include oil, grease, foam, fuel, petroleum products, and construction-related, excavated, organic or earthen materials.

1. This Order is subject to modification or revocation upon administrative or judicial review, including review and amendment pursuant to Water Code section 13330, and California Code of Regulations, title 23, chapter 28, Article 6 commencing with sections 3867-3869, inclusive. Additionally, the Central Valley Water Board reserves the right to suspend, cancel, or modify and reissue this Order, after providing notice to the Permittee, if the Central Valley Water Board determines that: the Project fails to comply with any of the conditions of this Order; or, when necessary to implement any new or revised water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.) or federal Clean Water Act section 303 (33 U.S.C. § 1313). For purposes of Clean Water Act section 401(d), the condition constitutes a limitation necessary to assure compliance with water quality standards and appropriate requirements of state law.

- 2. This Order is not intended and shall not be construed to apply to any activity involving a hydroelectric facility requiring a Federal Energy Regulatory Commission (FERC) license or an amendment to a FERC license, unless the pertinent certification application was filed pursuant to subsection 3855(b) of chapter 28, title 23 of the California Code of Regulations, and that application specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.
- **3.** This Order is conditioned upon total payment of any fee required under title 23 of the California Code of Regulations and owed by the Permittee.
- 4. In the event of any violation or threatened violation of the conditions of this Order, the violation or threatened violation shall be subject to any remedies, penalties, process, or sanctions as provided for under state and federal law. For purposes of Clean Water Act, section 401(d), the applicability of any state law authorizing remedies, penalties, processes, or sanctions for the violation or threatened violation constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements incorporated into this Order.

#### E. General Compliance

- 1. Failure to comply with any condition of this Order shall constitute a violation of the Porter-Cologne Water Quality Control Act and the Clean Water Act. The Permittee and/or discharger may then be subject to administrative and/or civil liability pursuant to Water Code section 13385.
- 2. Permitted actions must not cause a violation of any applicable water quality standards, including impairment of designated beneficial uses for receiving waters as adopted in the Basin Plans by any applicable Central Valley Water Board or any applicable State Water Board (collectively Water Boards) water quality control plan or policy. The source of any such discharge must be eliminated as soon as practicable.
- 3. In response to a suspected violation of any condition of this Order, the Central Valley Water Board may require the holder of this Order to furnish, under penalty of perjury, any technical or monitoring reports the Water Boards deem appropriate, provided that the burden, including costs, of the reports shall bear a reasonable relationship to the need for the reports and the benefits to be obtained from the reports. The additional monitoring requirements ensure that permitted discharges and activities comport with any applicable effluent limitations, water quality standards, and/or other appropriate requirement of state law.

**4.** The Permittee must, at all times, fully comply with engineering plans, specifications, and technical reports submitted to support this Order; and all subsequent submittals required as part of this Order. The conditions within this Order and Attachments supersede conflicting provisions within Permittee submittals.

- 5. This Order and all of its conditions contained herein continue to have full force and effect regardless of the expiration or revocation of any federal license or permit issued for the Project. For purposes of Clean Water Act, section 401(d), this condition constitutes a limitation necessary to assure compliance with the water quality standards and other pertinent requirements of state law.
- 6. Construction General Permit Requirement. The Permittee shall obtain coverage under the National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities Order No. 2009-0009-DWQ, as amended, for discharges to surface waters comprised of storm water associated with construction activity, including, but not limited to, demolition, clearing, grading, excavation, and other land disturbance activities of one or more acres, or where projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres.

#### F. Administrative

- 1. Signatory requirements for all document submittals required by this Order are presented in Attachment E of this Order.
- 2. This Order does not authorize any act which results in the taking of a threatened, endangered or candidate species or any act, which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish & G. Code, §§ 2050-2097) or the federal Endangered Species Act (16 U.S.C. §§ 1531-1544). If a "take" will result from any act authorized under this Order held by the Permittee, the Permittee must obtain authorization for the take prior to any construction or operation of the portion of the Project that may result in a take. The Permittee is responsible for meeting all requirements of the applicable endangered species act for the Project authorized under this Order.
- 3. The Permittee shall grant Central Valley Water Board staff, or an authorized representative (including an authorized contractor acting as a Water Board representative), upon presentation of credentials and other documents as may be required by law, permission to:
  - **a.** Enter upon the Project or compensatory mitigation site(s) premises where a regulated facility or activity is located or conducted, or where records are kept.
  - **b.** Have access to and copy any records that are kept and are relevant to the Project or the requirements of this Order.
  - **c.** Inspect any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this Order.
  - **d.** Sample or monitor for the purposes of assuring Order compliance.
- **4.** A copy of this Order shall be provided to any consultants, contractors, and subcontractors working on the Project. Copies of this Order shall remain at the Project site for the duration of this Order. The Permittee shall be responsible for work conducted by its consultants, contractors, and any subcontractors.

**5.** A copy of this Order must be available at the Project site(s) during construction for review by site personnel and agencies. All personnel performing work on the Project shall be familiar with the content of this Order and its posted location at the Project site.

#### G. Construction

#### 1. Dewatering - Not Applicable

#### 2. Directional Drilling

a. If installation or relocation of dry and/or wet utility lines is anticipated, the Applicant shall develop and submit Dry and Wet Utility Work Plan to the Central Valley Water Board Contact indicated in this Certification prior to commencement of dry and wet utility construction. The Dry and Wet Utility Plan must cover all phases of the certified project that will impact waters of the United States, and shall be consistent with this Certification.

The Dry and Wet Utility Plan shall include the types of dry and wet utilities to be removed and installed, method and duration of activities, structure configuration, construction materials, equipment, erosion and sediment controls, and a map or drawing indicating the location(s) of dry and wet utility work, as related to any water of the United States, in the Project area.

Should the methodology for dry and wet utility work include directional drilling, the Dry and Wet Utility Plan shall incorporate a Directional Drilling Plan to address potential frac-outs. The Directional Drilling Plan shall include, but not be limited to, a description of directional drilling activities, dry and wet utility routes, crossing locations and methods, and other geotechnical considerations (i.e., surficial overburden deposits, clays and shales, bedrock formations, hydrogeology), and a reporting procedure should any level of discharge from a frac-out occur, regardless of the discharge size.

The Directional Drilling Plan must be stamped by a California Registered Geologist or Engineer.

#### 3. Dredging - Not Applicable

#### 4. Fugitive Dust – Not Applicable

#### 5. Good Site Management "Housekeeping"

- a. The Permittee shall develop and maintain onsite a project-specific Spill Prevention, Containment and Cleanup Plan outlining the practices to prevent, minimize, and/or clean up potential spills during construction of the Project. The Plan must detail the Project elements, construction equipment types and location, access and staging and construction sequence. The Plan must be made available to the Central Valley Water Board staff upon request.
- b. Refueling of equipment within the floodplain or within 300 feet of the waterway is prohibited. If critical equipment must be refueled within 300 feet of the waterway, spill prevention and countermeasures must be implemented to avoid spills. Refueling areas shall be provided with secondary containment including drip pans and/or placement of absorbent material. No hazardous materials, pesticides, fuels, lubricants, oils, hydraulic fluids, or other construction-related potentially hazardous

substances should be stored within a floodplain or within 300 feet of a waterway. The Permittee must perform frequent inspections of construction equipment prior to utilizing it near surface waters to ensure leaks from the equipment are not occurring and are not a threat to water quality.

**c.** All materials resulting from the Project shall be removed from the site and disposed of properly.

#### 6. Hazardous Materials

- a. The discharge of petroleum products, any construction materials, hazardous materials, pesticides, fuels, lubricants, oils, hydraulic fluids, raw cement, concrete or the washing thereof, asphalt, paint, coating material, drilling fluids, or other substances potentially hazardous to fish and wildlife resulting from or disturbed by project-related activities is prohibited and shall be prevented from contaminating the soil and/or entering waters of the state. In the event of a prohibited discharge, the Permittee shall comply with notification requirements in sections XIV.B.3.a and XIV.B.3.b.
- **b.** Concrete must be completely cured before coming into contact with waters of the United States and waters of the state. Surface water that contacts wet concrete must be pumped out and disposed of at an appropriate off-site commercial facility, which is authorized to accept concrete wastes.

#### 7. Invasive Species and Soil Borne Pathogens – Not Applicable

#### 8. In-Water Work

a. In-water work shall occur during periods of no precipitation.

#### 9. Post-Construction Storm Water Management

- a. The Permittee must minimize the short and long-term impacts on receiving water quality from the Project by implementing the following post-construction storm water management practices and as required by local agency permitting the Project, as appropriate:
  - i. Minimize the amount of impervious surface;
  - ii. Provide treatment BMPs to reduce pollutants in runoff:
  - iii. Ensure existing waters of the state (e.g., wetlands, vernal pools, or creeks) are not used as pollutant source controls and/or treatment controls;
  - iv. Preserve and where possible, create or restore areas that provide important water quality benefits, such as riparian corridors, wetlands, and buffer zones;
  - v. Limit disturbances of natural water bodies and natural drainage systems caused by development (including development of roads, highways, and bridges);
  - vi. Use existing drainage master plans or studies to ensure incorporation of structural and non-structural BMPs to mitigate the projected pollutant load increases in surface water runoff;
  - vii. Identify and avoid development in areas that are particularly susceptible to erosion and sediment loss, or establish development guidance that protects areas from erosion/ sediment loss; and

viii. Control post-development peak storm water run-off discharge rates and velocities to prevent or reduce downstream erosion, and to protect stream habitat

- **b.** The Permittee shall ensure that all development within the Project provides verification of maintenance provisions for post-construction structural and treatment control BMPs as required by the local agency permitting the Project. Verification shall include one or more of the following, as applicable:
  - i. The developer's signed statement accepting responsibility for maintenance until the maintenance responsibility is legally transferred to another party; or
  - ii. Written conditions in the sales or lease agreement that require the recipient to assume responsibility for maintenance; or
  - **iii.** Written text in Project conditions, covenants and restrictions for residential properties assigning maintenance responsibilities to a home owner's association, or other appropriate group, for maintenance of structural and treatment control BMPs; or
  - iv. Any other legally enforceable agreement that assigns responsibility for storm water BMPs maintenance.

#### 10. Roads

#### 11. Sediment Control

- a. Except for activities permitted by the United States Army Corps of Engineers under Section 404 of the Clean Water Act and/or Section 10 of the Rivers and Harbors Act, soil, silt, or other organic materials shall not be placed where such materials could pass into surface water or surface water drainage courses.
- **b.** Silt fencing, straw wattles, or other effective management practices must be used along the construction zone to minimize soil or sediment along the embankments from migrating into the waters of the state through the entire duration of the Project.
- **c.** The use of netting material (e.g., monofilament-based erosion blankets) that could trap aquatic dependent wildlife is prohibited within the Project area.

#### 12. Special Status Species

No federally or state-listed threatened or endangered species are listed within the project area.

#### 13. Stabilization/Erosion Control

- **a.** All areas disturbed by Project activities shall be protected from washout and erosion.
- **b.** Hydroseeding shall be performed with California native seed mix.

#### 14. Storm Water

**a.** During the construction phase, the Permittee must employ strategies to minimize erosion and the introduction of pollutants into storm water runoff. These strategies must include the following:

i. The Storm Water Pollution Prevention Plan must be prepared during the Project planning and design phases and implemented, as appropriate, before construction; and

- ii. An effective combination of erosion and sediment control Best Management Practices (BMPs) must be implemented and adequately working prior to the rainy season and during all phases of construction.
- H. Site Specific Not Applicable
- I. Total Maximum Daily Load (TMDL) Not Applicable

#### J. Mitigation for Temporary Impacts

- 1. The Permittee shall restore all areas of temporary impacts, including Project site upland areas, which could result in a discharge to waters of the state to preconstruction contours and conditions upon completion of construction activities.
- 2. If restoration of temporary impacts to waters of the state is not completed within 90 days of the impacts, compensatory mitigation may be required to offset temporal loss of waters of the state.

#### K. Compensatory Mitigation for Permanent Impacts<sup>7</sup>

- Final Compensatory Mitigation Plan The Permittee shall provide compensatory
  mitigation for impacts to waters of the United States and state as required by the
  United States Army Corps of Engineers. Any deviations from, or revisions to, the
  amount of compensatory mitigation must be pre-approved by Central Valley Water
  Board staff.
- 2. Permittee-Responsible Compensatory Mitigation Responsibility Not Applicable
- 3. Purchase of Mitigation Credits by Permittee for Compensatory Mitigation
  - **a.** A copy of the fully executed agreement for the purchase of mitigation credits shall be provided to the Central Valley Water Board prior to proceeding with the activity authorized by this Certification.

#### 4. Total Required Compensatory Mitigation

- a. The Permittee is required to provide compensatory mitigation for the authorized impact to 0.22 acre(s) of wetlands by purchasing 0.22 Aquatic Resource Credits at the Toad Hill Mitigation Bank as determined by the United States Army Corps of Engineers.
- **b.** Total required Project compensatory mitigation information for permanent physical loss of area is summarized in Table 3.

# Table 3: Required Project Compensatory Mitigation Quantity for Permanent Physical Loss of Area<sup>8</sup>

<sup>&</sup>lt;sup>7</sup> Compensatory Mitigation is for permanent physical loss and permanent ecological degradation of a water of the state.

<sup>&</sup>lt;sup>8</sup> For Staff use only: Record quantities in CIWQS table side A for Compensatory Mitigation for Permanent Physical Loss of Area.

Туре	Type <sup>9</sup>	·	Est.	Re-est.	Reh.	Enh.	Pres.	Unknown
Wetland	MB	Acres	0.22					

#### L. Ecological Restoration and Enhancement – Not Applicable

#### M. Mitigation Bank Development - Not Applicable

#### N. Certification Deviation

- 1. Minor modifications of Project locations or predicted impacts may be necessary as a result of unforeseen field conditions, necessary engineering re-design, construction concerns, or similar reasons. Some of these prospective Project modifications may have impacts on water quality. Some modifications of Project locations or predicted impacts may qualify as Certification Deviations as set forth in Attachment F. For purposes of this Certification, a "Certification Deviation" is a Project locational or impact modification that does not require an immediate amendment of the Order, because the Central Valley Water Board has determined that any potential water quality impacts that may result from the change are sufficiently addressed by the Order conditions and the CEQA Findings. After the termination of construction, this Order will be formally amended to reflect all authorized Certification Deviations and any resulting adjustments to the amount of water resource impacts and required compensatory mitigation amounts.
- 2. A Project modification shall not be granted a Certification Deviation if it warrants or necessitates changes that are not addressed by the Order conditions or the CEQA environmental document such that the Project impacts are not addressed in the Project's environmental document or the conditions of this Order. In this case a supplemental environmental review and different Order will be required.

#### XV. Water Quality Certification

I hereby issue the Order for the Hidden Hills Phase 1 Project, WDID No. 5A31CR00451 certifying that as long as all of the conditions listed in this Order are met, any discharge from the referenced Project will comply with the applicable provisions of Clean Water Act sections 301 (Effluent Limitations), 302 (Water Quality Related Effluent Limitations), 303 (Water Quality Standards and Implementation Plans), 306 (National Standards of Performance), and 307 (Toxic and Pretreatment Effluent Standards).

Except insofar as may be modified by any preceding conditions, all Order actions are contingent on: (a) the discharge being limited and all proposed mitigation being completed in strict compliance with the conditions of this Order and the attachments to this Order; and, (b) compliance with all applicable requirements of Statewide Water Quality Control Plans and Policies, the Regional Water Boards' Water Quality Control Plans and Policies.

<sup>&</sup>lt;sup>9</sup> Compensatory mitigation type may be: In-Lieu-Fee (ILF); Mitigation Bank (MB); Permittee-Responsible (PR)

<sup>&</sup>lt;sup>10</sup> Methods: establishment (Est.), reestablishment (Re-est.), rehabilitation (Reh.), enhancement (Enh.), preservation (Pres.). Unknown applies to advance credits with an unknown method and or location.

#### A. Environmental Review

On 11 December 2012, the City of Lincoln, as lead agency, certified a Final Environmental Impact Report (FEIR)) (State Clearinghouse (SCH) No. 2010102018) for the Project and filed a Notice of Determination (NOD) at the SCH on 14 December 2014. The Central Valley Water Board is a responsible agency under CEQA (Pub. Resources Code, § 21069) and in making its determinations and findings, must presume that City of Lincoln's certified environmental document comports with the requirements of CEQA and is valid. (Pub. Resources Code, § 21167.3.) The Central Valley Water Board has reviewed and considered the environmental document and finds that the environmental document prepared by City of Lincoln addresses the Project's water resource impacts. (Cal. Code Regs., tit. 14, § 15096, subd. (f).) The environmental document includes the mitigation monitoring and reporting program (MMRP) developed by the City of Lincoln for all mitigation measures that have been adopted for the Project to reduce potential significant impacts. (Pub. Resources Code, § 21081.6, subd. (a)(1); Cal. Code Regs., tit. 14, § 15091, subd. (d).)

#### B. Incorporation by Reference

Pursuant to CEQA, these Findings of Facts (Findings) support the issuance of this Order based on the Project FEIR, the application for this Order, and other supplemental documentation.

All CEQA project impacts, including those discussed in subsection C below, are analyzed in detail in the Project FEIR which is incorporated herein by reference. The Project FEIR is available at: <a href="http://lincolnca.gov/city-hall/departments-divisions/community-development/environmental-documents">http://lincolnca.gov/city-hall/departments-divisions/community-development/environmental-documents</a>

Requirements under the purview of the Central Valley Water Board in the MMRP are incorporated herein by reference.

The Permittee's application for this Order, including all supplemental information provided, is incorporated herein by reference.

#### C. Findings

The FEIR describes the potential significant environmental effects to water resources. Having considered the whole of the record, including comments received during the public review process, the Central Valley Water Board makes the following findings:

(1) Findings regarding impacts that will be avoided or mitigated to a less than significant level. (Pub. Resources Code, § 21081, subd. (a)(1); Cal. Code Regs., tit. 14, § 15091, subd. (a)(1).)

Changes or alterations have been required in, or incorporated into, the Project which avoid or substantially lessen the significant environmental effect as identified in the FEIR.

#### a.i. Potential Significant Impact:

**4.8-1:** The proposed project would increase the amount of impervious surfaces and alter drainage patterns, which could increase the potential for localized and downstream flooding.

#### a.ii. Facts in Support of Finding:

#### 4.8-1(a)

i): Project applicant(s) shall ensure that planned improvements to the SR 193 bridge are operational prior to receiving a grading permit for development in the programmatic portion (beginning with Phase 2).

#### OR

Reg. Meas. ID: 410529

Place ID: 830341

ii) If SR 193 bridge improvements are not completed prior to receiving a grading permit for areas within the Auburn Ravine watershed, beginning with Phase 2, the applicant(s) shall provide on-site detention and/or retention to mitigate increases in water surface elevation (WSE) if the results of modeling show a 0.05-foot increase or greater in WSE, or if peak flow rates increase by 1 percent or more within project boundary or downstream of the SR 193 bridge.

#### AND

- Specific Plan, City of Lincoln, CA, Drainage Master Plan Table II.F.1B for the programmatic portion in order to mitigate potential on-site flooding from increased peak flows associated with development of the projects. Prior to issuance of a grading permit, project applicants shall demonstrate that provisions for peak flow mitigation in the preliminary grading plan, as defined in Village 1 Specific Plan, City of Lincoln, CA, Drainage Master Plan Table II.F.1B and Tables III.A.3A to III.A.3F, as applicable for the project. The City Engineer shall review plans for compliance with the applicable portions of Table II.F.1B and Tables III.A.3A to III.A.3F, as applicable, prior to issuance of a grading permit. Prior to issuing a building permit for any project in the Village 1 Specific Plan, overbank excavation and stabilization of channels that will receive runoff from the area(s) to be developed shall be completed. The City Engineer shall confirm that peak flow mitigation has been constructed in accordance with the approved plans.
- **iv)** The project applicant for projects within the programmatic portion of the project site shall prohibit development of structures within the modeled floodplains of North and South Ingram Slough as identified in the Village 1 Specific Plan, City of Lincoln, CA, Drainage Master Plan Post-Project 100-Year Floodplain Alt. 193 Fix figures.

#### b.i. Potential Significant Impact:

**4.8-2** The proposed project would increase stormwater volumes in Auburn Ravine, Ingram Slough, Orchard Creek, and ultimately the Natomas Cross Canal.

#### b.ii. Facts in Support of Finding:

4.8-2(a)

Prior to approval of the first final map, the Applicant shall identify 87.1 acre- feet of storage capacity in the watershed to accommodate increased stormwater runoff volumes associated with the programmatic portion of the Village 1 Specific Plan. Storage capacity may be incorporated into on-site design, obtained at the approved Lakeview Farm Volumetric Mitigation Facility (LFVMF), if operational at the time of development, or at a location approved by or acceptable to the City.

The Applicant shall be required to cover its fair share of costs associated with construction, operation, and maintenance of the LFVMF to offset increased stormwater volume generated by the Village 1 Specific Plan. For capital improvements, funding shall be through the City's existing Public Facilities Element (PFE) program.

Fees for operation and maintenance shall be through an assessment district established during the Final Map processing. Fees shall be paid in conjunction with issuance of building permits.

If, at the time the first final map is submitted for approval, the regional facilities are not available or operational, or if additional capacity is required, the Applicant shall incorporate in to the final design sufficient on-site storage capacity, or a combination of on-site and off-site capacity, to fully mitigate the 87.1 acre-feet.

If off-site facilities are used, the Applicant shall be required to cover its fair share of costs associated with construction, operation, maintenance, and management of the regional retention facilities to offset increased stormwater volume generated by the Village1 Specific Plan. Assuming the regional facility has been constructed, Applicant shall pay the appropriate fees.

#### c.i. Potential Significant Impact:

**4.8-3** The proposed project would include placement of fill in the 100-year floodplain (overbank area) to accommodate road crossings, culverts, and other structures.

#### c.ii. Facts in Support of Finding:

- **4.8-3(a)** When the Oak Tree Lane bridge is in the design phase, the City shall ensure the bridge is designed to convey 100-year storm event flows in accordance with the Village 1 Specific Plan (V1SP), City of Lincoln, CA, Drainage Master Plan (DMP).
- **4.8-3(b)** Implement Mitigation Measure 4.8-1 (V1SP DMP recommendations)

#### d.i. Potential Significant Impact:

**4.8-4** The proposed project would increase the types and amounts of pollutants in stormwater runoff that could be discharged to Ingram Slough and its tributaries and Auburn Ravine, which could degrade water quality.

#### d.ii. Facts in Support of Finding:

**4.8-4(a)** Low Impact Development BMPs. Project Conditions of Approval shall specify that appropriate Best Management Practices (BMPs) be incorporated into project design prior to approval of final grading/improvement plan(s) to reduce urban pollutants in runoff, consistent with goals and standards established under federal and State non-point source discharge NPDES regulations and Basin Plan water quality objectives, the City's Post-Construction Stormwater Runoff Control Ordinance No. 826B, and Low-Impact Development (LID) alternatives for stormwater quality control per Public Facilities and Services Implementation Measure 3.0 of the adopted 2050 General Plan.

Reg. Meas. ID: 410529

Place ID: 830341

The proposed water quality facilities shall be identified and designed in a Water Quality Management Plan prepared in accordance with Section 8.60.40 of the City's Municipal Code for City review and approval. All water quality facilities identified in the Water Quality Management Plan shall be constructed with the installation of the infrastructure.

The Water Quality Management Plan shall include a description of all non-structural BMPs and include Covenants, Codes, and Restrictions (CC&Rs), or similar regulatory mechanism, to enforce implementation of non-structural BMPs. Non-structural BMPs shall include, but not be limited to, "good housekeeping" practices for materials storage and waste management, storm drain system stenciling, landscape chemical use guidelines, and street sweeping.

The Water Quality Management Plan shall also include the method or methods for funding the long-term maintenance of the proposed water quality facilities. The City shall formally adopt and implement a funding mechanism specifically to fund the long-term maintenance of the proposed water quality facilities as proposed by the Stormwater Management Plan.

The project Applicant shall submit a site-specific BMP plan showing the on- site locations and effectiveness of the BMP facilities proposed for long-term water quality impact reduction prior to project approval. The plan shall include a method or methods for financing the long-term maintenance of the proposed site-specific facilities.

All BMPs for water quality protection, source control, and treatment control shall be developed in accordance with the Stormwater Quality Design Manual for the Sacramento and South Placer Regions (or other similar source approved by the City) for the project. The BMPs shall be designed to mitigate (minimize, infiltrate, filter, or treat) stormwater runoff. Flow or volume based post-construction BMPs shall be designed at a minimum in accordance with the PCFCWCD and City standards and shall be included for long-term maintenance of BMPs. All BMPs shall reflect the Best Available Technologies (BAT) available at the time of

implementation and shall reflect site-specific limitations. The City shall make the final determinations as to the appropriateness of the BMPs proposed for the proposed project and the City shall ensure future implementation, operation, and maintenance of the BMPs.

To comply with the requirements of the Placer County Mosquito and Vector Control District, all BMPs shall be designed to discharge all waters within 96 hours of the completion of runoff from a storm event. All graded areas must drain so that no standing water can accumulate for more than 96 hours within water quality facilities.

Stormwater runoff from the proposed project's impervious surfaces (including roads) shall be collected and routed through specially designed water quality treatment facilities (BMPs) for removal of pollutants of concern (i.e. sediment, oil/grease, etc.), as approved by the City. The Applicant shall verify that proposed BMPs are appropriate to treat the pollutants of concern from the proposed project and shall provide for the establishment of vegetation, where specified, by means of proper irrigation, for effective performance of BMPs. Maintenance of these facilities shall be provided by the City. Prior to project approval or Final Map approval, easements shall be created and offered for dedication to the City for maintenance and access to these facilities in anticipation of possible City maintenance. No water quality facility construction shall be permitted within any identified wetlands area, floodplain, or right-of-way, except as authorized by project approvals.

(2) Findings regarding mitigation measures which are the responsibility of another agency. (Pub. Resources Code, § 21081, subd. (a)(2); Cal. Code Regs., tit. 14, §15091, subd.(a)(2).)

There are changes or alterations that are within the responsibility and jurisdiction of another public agency and not the jurisdiction of the Central Valley Water Board. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

#### D. Determination

The Central Valley Water Board has determined that the Project, when implemented in accordance with the MMRP and the conditions in this Order, will not result in any significant adverse water quality or supply impacts. (Cal. Code Regs., tit. 14, § 15096, subd. (h).)

(This page intentionally left blank)

#### Copies of this Form

In order to identify your project, it is necessary to include a copy of the Project specific Cover Sheet below with your report: please retain for your records. If you need to obtain a copy of the Cover Sheet you may download a copy of this Order as follows:

- 1. Go to: http://www.waterboards.ca.gov/water\_issues/programs/cwa401/certifications.shtml
- 2. Find your Order in the table based on Applicant, Date, and Subject headers.

#### **Report Submittal Instructions**

- Check the box on the Report and Notification Cover Sheet next to the report or notification you are submitting.
  - Part A (Annual Report): This report will be submitted annually from the anniversary of Project effective date until a Notice of Project Complete Letter is issued.
  - Part B (Project Status Notifications): Used to notify the Central Valley Water Board of the status of the Project schedule that may affect Project billing.
  - Part C (Conditional Notifications and Reports): Required on a case by case basis for accidental discharges of hazardous materials, violation of compliance with water quality standards, notification of in-water work, or other reports.
- 2. Sign the Report and Notification Cover Sheet and attach all information requested for the Report Type.
- 3. Electronic Report Submittal Instructions:
  - Submit signed Report and Notification Cover Sheet and required information via email to: centralvalleyredding@waterboards.ca.gov and cc: Daniel.Warner@waterboards.ca.gov
  - Include in the subject line of the email:
     Subject: ATTN: Daniel Warner; Reg. Measure ID: 410529 Report

## **Definition of Reporting Terms**

- 1. <u>Active Discharge Period:</u> The active discharge period begins with the effective date of this Order and ends on the date that the Permittee receives a Notice of Completion of Discharges Letter or, if no post-construction monitoring is required, a Notice of Project Complete Letter. The Active Discharge Period includes all elements of the Project including site construction and restoration, and any Permittee responsible compensatory mitigation construction.
- 2. Request for Notice of Completion of Discharges Letter: This request by the Permittee to the Central Valley Water Board staff pertains to projects that have post construction monitoring requirements, e.g. if site restoration was required to be monitored for 5 years following construction. Central Valley Water Board staff will review the request and send a Completion of Discharges Letter to the Permittee upon approval. This letter will initiate the post-discharge monitoring period and a change in fees from the annual

active discharge fee to the annual post-discharge monitoring fee.

3. Request for Notice of Project Complete Letter: This request by the Permittee to the Central Valley Water Board staff pertains to projects that either have completed post-construction monitoring and achieved performance standards or have no post-construction monitoring requirements, and no further Project activities are planned. Central Valley Water Board staff will review the request and send a Project Complete Letter to the Permittee upon approval. Termination of annual invoicing of fees will correspond with the date of this letter.

- 4. <u>Post-Discharge Monitoring Period:</u> The post-discharge monitoring period begins on the date of the Notice of Completion of Discharges Letter and ends on the date of the Notice of Project Complete Letter issued by the Central Valley Water Board staff. The Post-Discharge Monitoring Period includes continued water quality monitoring or compensatory mitigation monitoring.
- 5. Effective Date: Date of Order issuance.

#### **Map/Photo Documentation Information**

When submitting maps or photos, please use the following formats.

1. Map Format Information:

Preferred map formats of at least 1:24000 (1" = 2000') detail (listed in order of preference):

- **GIS shapefiles**: The shapefiles must depict the boundaries of all project areas and extent of aquatic resources impacted. Each shape should be attributed with the extent/type of aquatic resources impacted. Features and boundaries should be accurate to within 33 feet (10 meters). Identify datum/projection used and if possible, provide map with a North American Datum of 1983 (NAD38) in the California Teale Albers projection in feet.
- Google KML files saved from Google Maps: My Maps or Google Earth Pro. Maps must show the boundaries of all project areas and extent/type of aquatic resources impacted. Include URL(s) of maps. If this format is used include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.
- Other electronic format (CAD or illustration format) that provides a context for location (inclusion of landmarks, known structures, geographic coordinates, or USGS DRG or DOQQ). Maps must show the boundaries of all project areas and extent/type of aquatic resources impacted. If this format is used include a spreadsheet with the object ID and attributed with the extent/type of aquatic resources impacted.
- Aquatic resource maps marked on paper USGS 7.5 minute topographic maps or Digital Orthophoto
  Quarter Quads (DOQQ) printouts. Maps must show the boundaries of all project areas and extent/type
  of aquatic resources impacted. If this format is used include a spreadsheet with the object ID and
  attributed with the extent/type of aquatic resources impacted.
- 2. <u>Photo-Documentation:</u> Include a unique identifier, date stamp, written description of photo details, and latitude/longitude (in decimal degrees) or map indicating location of photo. Successive photos should be taken from the same vantage point to compare pre/post construction conditions.

# Part A – Project Reporting

Report Type 1	Мо	nthly Report
Report Purpose	Not env	ifies Central Valley Water Board staff of the Project status and ironmental compliance activities on a monthly basis.
When to Submit	On to th	the 1st day of each month until a Notice of Project Complete Letter is issued ne Permittee.
Report Contents	 	Construction Summary  Describe Project progress and schedule including initial ground disturbance, site clearing and grubbing, road construction, site construction, and the implementation status of construction storm water Best Management Practices (BMPs <sup>12</sup> ). If construction has not started, provide estimated start date.
		Event Summary  Describe distinct Project activities and occurrences, including environmental monitoring, surveys, and inspections.
	 	Photo Summary Provide photos of Project activities. For each photo, include a unique site dentifier, date stamp, written description of photo details, and atitude/longitude (in decimal degrees) or map indicating location of photo. Successive photos should be taken from the same vantage point to compare pre/post construction conditions.
	4.	Compliance Summary
		a) List name and organization of environmental surveyors, monitors, and inspectors involved with monitoring environmental compliance for the reporting period.
		b) List associated monitoring reports for the reporting period.
	. (	Summarize observed incidences of non-compliance, compliance issues, minor problems, or occurrences.
		d) Describe each observed incidence in detail. List monitor name and organization, date, location, type of incident, corrective action taken (if any), status, and resolution.

<sup>&</sup>lt;sup>12</sup> Best Management Practices (BMPs) is a term used to describe a type of water pollution or environmental control.

Report Type 2	Annual Report
Report Purpose	Notify the Central Valley Water Board staff of Project status during both the active discharge and post-discharge monitoring periods.
When to Submit	Annual reports shall be submitted each year on the 1st day of May. Annual reports shall continue until a Notice of Project Complete Letter is issued to the Permittee.
Report Contents	The contents of the annual report shall include the topics indicated below for each project period. Report contents are outlined in Annual Report Topics below.
	<ul> <li>During the Active Discharge Period</li> <li>Topic 1: Construction Summary</li> <li>Topic 2: Mitigation for Temporary Impacts Status</li> <li>Topic 3: Compensatory Mitigation for Permanent Impacts Status</li> </ul>
	<ul> <li>During the Post-Discharge Monitoring Period</li> <li>Topic 2: Mitigation for Temporary Impacts Status</li> <li>Topic 3: Compensatory Mitigation for Permanent Impacts Status</li> </ul> Annual Report Topics (1-3)
Annual Report Topic 1	Construction Summary
When to Submit	With the annual report during the Active Discharge Period.
Report Contents	<ol> <li>Project progress and schedule including initial ground disturbance, site clearing and grubbing, road construction, site construction, and the implementation status of construction storm water best management practices (BMPs). If construction has not started, provide estimated start date and reasons for delay.</li> <li>Map showing general Project progress.</li> <li>If applicable:         <ul> <li>Summary of Conditional Notification and Report Types 6 and 7 (Part C below).</li> <li>Summary of Certification Deviations. See Certification Deviation Attachment for further information.</li> </ul> </li> </ol>
Annual Report Topic 2	Mitigation for Temporary Impacts Status
When to Submit	With the annual report during both the Active Discharge Period and Post- Discharge Monitoring Period.
Report Contents	<ol> <li>Planned date of initiation and map showing locations of mitigation for temporary impacts to waters of the state and all upland areas of temporary disturbance which could result in a discharge to waters of the state.</li> <li>If mitigation for temporary impacts has already commenced, provide a map and information concerning attainment of performance standards contained in the restoration plan.</li> </ol>
Annual Report Topic 3	Compensatory Mitigation for Permanent Impacts Status

When to Submit	With the annual report during both the Active Discharge Period and Post- Discharge Monitoring Period.
Report Contents	*If not applicable report N/A.
	<ol> <li>Part A. Permittee Responsible</li> <li>Planned date of initiation of compensatory mitigation site installation.</li> <li>If installation is in progress, a map of what has been completed to date.</li> <li>If the compensatory mitigation site has been installed, provide a final map and information concerning attainment of performance standards contained in the compensatory mitigation plan.</li> </ol>
- Particular Control of Control o	Part B. Mitigation Bank or In-Lieu Fee
	1. Status or proof of purchase of credit types and quantities.
	2. Include the name of bank/ILF Program and contact information.
	3. If ILF, location of project and type if known.

# Part B – Project Status Notifications

Report Type 3	Commencement of Construction
Report Purpose	Notify Central Valley Water Board staff prior to the start of construction.
When to Submit	Must be received at least seven (7) days prior to start of initial ground disturbance activities.
Report Contents	<ol> <li>Date of commencement of construction.</li> <li>Anticipated date when discharges to waters of the state will occur.</li> <li>Project schedule milestones including a schedule for onsite compensatory mitigation, if applicable.</li> <li>Construction Storm Water General Permit WDID No.</li> </ol>

Report Type 4	Request for Notice of Completion of Discharges Letter
Report Purpose	Notify Central Valley Water Board staff that post-construction monitoring is required and that active Project construction, including any mitigation and permittee responsible compensatory mitigation, is complete.
When to Submit	Must be received by Central Valley Water Board staff within thirty (30) days following completion of all Project construction activities.
Report Contents	<ol> <li>Status of storm water Notice of Termination(s), if applicable.</li> <li>Status of post-construction storm water BMP installation.</li> <li>Pre- and post-photo documentation of all Project activity sites where the</li> </ol>
	<ul> <li>discharge of dredge and/or fill/excavation was authorized.</li> <li>4. Summary of Certification Deviation discharge quantities compared to initial authorized impacts to waters of the state, if applicable.</li> </ul>
	5. An updated monitoring schedule for mitigation for temporary impacts to waters of the state and permittee responsible compensatory mitigation during the post-discharge monitoring period, if applicable.

Report Type 5	Request for Notice of Project Complete Letter
Report Purpose	Notify Central Valley Water Board staff that construction and/or any post- construction monitoring is complete, or is not required, and no further Project activity is planned.
When to Submit	Must be received by Central Valley Water Board staff within thirty (30) days following completion of all Project activities.
Report Contents	<ol> <li>Part A: Mitigation for Temporary Impacts</li> <li>A report establishing that the performance standards outlined in the restoration plan have been met for Project site upland areas of temporary disturbance which could result in a discharge to waters of the state.</li> <li>A report establishing that the performance standards outlined in the restoration plan have been met for restored areas of temporary impacts to waters of the state. Pre- and post-photo documentation of all restoration sites.</li> </ol>

#### Hidden Hills Phase 1 Attachment D

Reg. Meas. ID: 410529 Place ID: 830341

#### Part B: Permittee Responsible Compensatory Mitigation

- 1. A report establishing that the performance standards outlined in the compensatory mitigation plan have been met.
- 2. Status on the implementation of the long-term maintenance and management plan and funding of endowment.
- 3. Pre- and post-photo documentation of all compensatory mitigation sites.
- 4. Final maps of all compensatory mitigation areas (including buffers).

#### Part C: Post-Construction Storm Water BMPs

- 1. Date of storm water Notice of Termination(s), if applicable.
- 2. Report status and functionality of all post-construction BMPs.

# Part C – Conditional Notifications and Reports

Report Type 6	Accidental Discharge of Hazardous Material Report
Report Purpose	Notifies Central Valley Water Board staff that an accidental discharge of hazardous material has occurred.
When to Submit	Within five (5) working days following the date of an accidental discharge.  Continue reporting as required by Central Valley Water Board staff.
Report Contents	<ol> <li>The report shall include the OES Incident/Assessment Form, a full description and map of the accidental discharge incident (i.e. location, time and date, source, discharge constituent and quantity, aerial extent, and photo documentation). If applicable, the OES Written Follow-Up Report may be substituted.</li> <li>If applicable, any required sampling data, a full description of the sampling methods including frequency/dates and times of sampling, equipment, locations of sampling sites.</li> </ol>
	3. Locations and construction specifications of any barriers, including silt curtains or diverting structures, and any associated trenching or anchoring.

Report Type 7	Violation of Compliance with Water Quality Standards Report
Report Purpose	Notifies Central Valley Water Board staff that a violation of compliance with water quality standards has occurred.
When to Submit	The Permittee shall report any event that causes a violation of water quality standards within three (3) working days of the noncompliance event notification to Central Valley Water Board staff.
Report Contents	The report shall include: the cause; the location shown on a map; and the period of the noncompliance including exact dates and times. If the noncompliance has not been corrected, include: the anticipated time it is expected to continue; the steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance; and any monitoring results if required by Central Valley Water Board staff.

Report Type 8	In-Water Work and Diversions Water Quality Monitoring Report
Report Purpose	Notifies Central Valley Water Board staff of the start and completion of in-water work. Reports the sampling results during in-water work and during the entire duration of temporary surface water diversions.
When to Submit	Seven (7) days prior to the start of in-water work. Within three (3) working days following the completion of in-water work. Surface water monitoring reports to be submitted two (2) weeks on initiation of in-water construction and during entire duration of temporary surface water diversions. Continue reporting in accordance with the approved water quality monitoring plan or as indicated in XIV.C.3.
Report Contents	As required by the approved water quality monitoring plan or as indicated in XIV.C.3.

Report Type 9	Modifications to Project Report
Report Purpose	Notifies Central Valley Water Board staff if the Project, as described in the application materials, is altered in any way or by the imposition of subsequent permit conditions by any local, state or federal regulatory authority.
When to Submit	If Project implementation as described in the application materials is altered in any way or by the imposition of subsequent permit conditions by any local, state or federal regulatory authority.
Report Contents	A description and location of any alterations to Project implementation. Identification of any Project modifications that will interfere with the Permittee's compliance with the Order.

Report Type 10	Transfer of Property Ownership Report
Report Purpose	Notifies Central Valley Water Board staff of change in ownership of the Project or Permittee-responsible mitigation area.
When to Submit	At least 10 working days prior to the transfer of ownership.
Report Contents	<ol> <li>A statement that the Permittee has provided the purchaser with a copy of this Order and that the purchaser understands and accepts:         <ul> <li>a. the Order's requirements and the obligation to implement them or be subject to administrative and/or civil liability for failure to do so; and</li> <li>b. responsibility for compliance with any long-term BMP<sup>13</sup> maintenance plan requirements in this Order.</li> </ul> </li> <li>A statement that the Permittee has informed the purchaser to submit a written request to the Central Valley Water Board to be named as the permittee in a revised order.</li> </ol>

Report Type 11	Transfer of Long-Term BMP Maintenance Report
Report Purpose	Notifies Central Valley Water Board staff of transfer of long-term BMP maintenance responsibility.
When to Submit	At least 10 working days prior to the transfer of BMP maintenance responsibility.
Report Contents	A copy of the legal document transferring maintenance responsibility of post-construction BMPs.

<sup>13</sup> Best Management Practices (BMPs) is a term used to describe a type of water pollution or environmental control.

#### SIGNATORY REQUIREMENTS

Reg. Meas. ID: 410529

Place ID: 830341

All Documents Submitted In Compliance With This Order Shall Meet The Following Signatory Requirements:

- 1. All applications, reports, or information submitted to the Central Valley Water Quality Control Board (Central Valley Water Board) must be signed and certified as follows:
  - a) For a corporation, by a responsible corporate officer of at least the level of vice-president.
  - b) For a partnership or sole proprietorship, by a general partner or proprietor, respectively.
  - c) For a municipality, or a state, federal, or other public agency, by either a principal executive officer or ranking elected official.
- 2. A duly authorized representative of a person designated in items 1.a through 1.c above may sign documents if:
  - a) The authorization is made in writing by a person described in items 1.a through 1.c above.
  - b) The authorization specifies either an individual or position having responsibility for the overall operation of the regulated activity.
  - c) The written authorization is submitted to the Central Valley Water Board Staff Contact prior to submitting any documents listed in item 1 above.
- 3. Any person signing a document under this section shall make the following certification:
  - "I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

#### **Certification Deviation Procedures**

Reg. Meas. ID: 410529

Place ID: 830341

#### Introduction

These procedures are put into place to preclude the need for Order amendments for minor changes in the Project routing or location. Minor changes or modifications in project activities are often required by the Permittee following start of construction. These deviations may potentially increase or decrease impacts to waters of the state. In such cases, a Certification Deviation, as defined in Section XIV.N of the Order, may be requested by the Permittee as set forth below:

#### **Process Steps**

Who may apply: The Permittee or the Permittee's duly authorized representative or agent (hereinafter, "Permittee") for this Order.

How to apply: By letter or email to the 401 staff designated as the contact for this Order.

<u>Certification Deviation Request:</u> The Permittee will request verification from the Central Valley Water Board staff that the project change qualifies as a Certification Deviation, as opposed to requiring an amendment to the Order. The request should:

- 1. Describe the Project change or modification:
  - a. Proposed activity description and purpose;
  - b. Why the proposed activity is considered minor in terms of impacts to waters of the state;
  - c. How the Project activity is currently addressed in the Order; and,
  - d. Why a Certification Deviation is necessary for the Project.
- 2. Describe location (latitude/longitude coordinates), the date(s) it will occur, as well as associated impact information (i.e., temporary or permanent, federal or non-federal jurisdiction, water body name/type, estimated impact area, etc.) and minimization measures to be implemented.
- 3. Provide all updated environmental survey information for the new impact area.
- 4. Provide a map that includes the activity boundaries with photos of the site.
- 5. Provide verification of any mitigation needed according to the Order conditions.
- 6. Provide verification from the CEQA Lead Agency that the proposed changes or modifications do not trigger the need for a subsequent environmental document, an addendum to the environmental document, or a supplemental EIR. (Cal. Code Regs., tit. 14, §§ 15162-15164.)

#### Post-Discharge Certification Deviation Reporting:

- 1. Within 30 calendar days of completing the approved Certification Deviation activity, the Permittee will provide a post-discharge activity report that includes the following information:
  - a. Activity description and purpose;
  - b. Activity location, start date, and completion date;
  - c. Erosion control and pollution prevention measures applied;
  - d. The net change in impact area by water body type(s) in acres, linear feet and cubic yards;
  - e. Mitigation plan, if applicable; and,
  - f. Map of activity location and boundaries; post-construction photos.

#### **Annual Summary Deviation Report:**

- 1. Until a Notice of Completion of Discharges Letter or Notice of Project Complete Letter is issued, include in the Annual Project Report (see Construction Notification and Reporting attachment) a compilation of all Certification Deviation activities through the reporting period with the following information:
  - a. Site name(s).
  - b. Date(s) of Certification Deviation approval.
  - c. Location(s) of authorized activities.
  - d. Impact area(s) by water body type prior to activity in acres, linear feet and cubic yards, as originally authorized in the Order.
  - e. Actual impact area(s) by water body type in, acres, linear feet and cubic yards, due to Certification Deviation activity(ies).
  - f. The net change in impact area by water body type(s) in acres, linear feet and cubic yards;
  - g. Mitigation to be provided (approved mitigation ratio and amount).
